The PCMTMP-IV Conference aims to provide a multinational platform where the latest trends in mathematics, physics and statistics can be presented and discussed in a friendly environment with the aim to learn from each other. Prospective presenters of contributed papers or of posters that offer new research or theoretical contributions are asked to submit the titles and abstracts of their contributed papers or posters. We highly encourage local Palestinian professors and Palestinian graduate students to participate in this multinational conference. In addition to the scientific program, the conference will include social entertainment events and local tours.
